

Scholarship Opportunities for Upperclass Students

Thomas E. and Ruth Mullen Scholars of the Upperclass Carswell Scholarship Program

The Committee on Scholarships and Student Aid annually recognizes up to ten students as Thomas E. and Ruth Mullen Scholars of the Upperclass Carswell Scholarships. Applicants must have completed at least one year of coursework at Wake Forest and are judged on the basis of academic and extracurricular leadership while here. The competition is keen, with recipients generally standing at least in the top 10% of the class. Once awarded, the scholarship may be renewed through the fourth year of undergraduate study. The stipend is \$1,500 per year (though it could be less if the student has extensive other scholarships or financial aid packages). Students selected before the senior year are eligible to apply for summer grants of up to \$2,000 to support research of educational value.

In order to apply, the student should address to the Committee a letter that includes an account of his or her academic progress, leadership, extracurricular activity, and contributions to university life. Such a letter is not simply a list but an expression of the student's intellectual and social development. In addition to this letter, the student must ask two faculty members to submit letters of recommendation to be sent directly to the Committee. All materials are due by October 15, but may be sent at any point during the summer or early fall. Approximately twenty finalists are invited to group interviews in November. Feel free to call the Merit-based Scholarships Office at 758-4209 with particular questions. Note that an application to become a Mullen Scholar automatically provides the members of the Committee access to your transcript and dean's record. Send all letters and supporting materials to The Committee on Scholarships and Student Aid, P.O. Box 7305, Winston-Salem, NC 27109.

Wake Forest Undergraduate Research Fellowships

Up to 150 competitive, merit-based fellowships each year financially assist students who collaborate with faculty mentors on research projects. The awards can be used during the school year or during the summer and are in the amount of \$2,000 or \$3,000. Student applicants must have a cumulative 3.0 grade point average at the time of application. Sophomore standing (29 or more credits passed) is required by the time the research project begins. More information and application materials are available at http://www.wfu.edu/undergraduate_college/research-fellowship/ on the Wake Forest website.

WFU Study Abroad Scholarships

Valued at \$2,000, these awards are available to enrolled students with a 3.0, who are studying abroad. Students may only receive one of these scholarships, and you must be receiving credit for courses taken while abroad. Applications may be obtained in the Center for International Studies. A variety of scholarships for study abroad at specific locations are also available. Information can be obtained from the Center for International Studies or its webpage (<http://www.wfu.edu/Academic-departments/International-Studies/studyabroad-scholars.html>).

Richter Scholarships

The Richter Scholars Program awards competitive, independent study scholarships of up to \$5,000 for students in the College, the Calloway School and the Graduate School of Arts and Sciences on the Reynolda Campus of Wake Forest University. Richter Scholarships will be awarded to students proposing an independent study project requiring travel away from Winston-Salem. International projects are especially encouraged. Most projects are expected to occur in the summer. More information can be obtained from Toby Hale in the Office of the Dean of the College.

Army Reserve Officers' Training Corps (ROTC) Scholarships

These scholarships are based on academic and extracurricular achievement as well as leadership potential. While the four-year scholarships are awarded after national high school competition, the three- and two-year scholarships are awarded after national college and university competition. Interested students should contact the Department of Military Science.

Clare Booth Luce Scholarships for Women in Science

In recent years, Wake Forest has been able to award two full-tuition, room and board scholarships to rising junior women majoring in biology, chemistry, physics, math, or computer science. The scholarships are awarded based on the applicant's potential for professional achievement in science or engineering. For more information contact Carole Browne in the Biology Department.

Departmental Scholarships

Several departments are able to award scholarships of varying amounts to a student or students majoring in the subject (or in some instances, simply significantly involved in studying the topic). See attached page for a listing of scholarships in various departments. Contact the chair of your department for more information about these scholarships.

Miscellaneous

Other possible sources of funds for upperclass students include scholarships awarded by some fraternities or sororities to their members, scholarships from the debate program, scholarships for serving as a Presidential Aide, three to five scholarships awarded by Phi Beta Kappa to top achievers of the junior class, and a scholarship sponsored by the Chi Rho musical group for one of its members. Inquire with each organization for more information.

Various Departmental Scholarships

(For more information about these and possibly other departmental scholarships, contact your department chair.)

Department	Scholarships Available	General Information
Art	Eleanor Layfield Davis Scholarship	for art majors; usually worth \$2500 annually
