Bill Wayne  
1234 Blue Moon Ln.  
Dallas, TX 99837

Dear Dr. Wayne:

I am thrilled to have John in my class this year! As you may know, Algebra II is a very difficult subject for many students, and in order to help John have a successful year, I'd like to collect a bit of information. Please fill out the following form with as much information as you wish to provide, in order to help me get acquainted with John's personality, learning style, and extra-curricular activities. Please keep in mind that the more information I have about John, the better I will be able to help him in the event that a problem should arise.

While some of the requested information may seem a little unnecessary, I would really like to try to incorporate some of John's interests into our curriculum this year. Sports, dance, and many other activities have natural mathematical extensions that we can explore during this course. Information on John's learning style will help me as a teacher know how best to present information to him throughout the course.

Please return the enclosed form by October 30<sup>th</sup>, and I look forward to working with you and John during this year.

Sincerely,

Quinn Morris
